

REPORT

10th Internet Governance Forum in Benin

TOPIC:

PROSPECT FOR BENIN'S DIGITAL ECONOMY 2021-2030

Venue: Azalaï Hotel Cotonou, and Online

Date: September 28, 2021

Introduction

For the past ten years, Benin has taken up the challenge of organizing its annual Internet Governance Forum. The initiative is carried from 2016, by the FGI Benin Association in collaboration with all the actors of the internet ecosystem in the country. This year, its general theme is: "**Prospects for Benin's Digital Economy 2021-2030**", and includes three sessions, one of which is high-level. The high-level session focuses on **the Digital Economy of Benin**. The other two sessions dealt respectively with the "**Challenges of digitization of processes, interoperability of databases and the digital future of universities**" and "**Prospects for the Digital Economy of Benin**". This report contains information on the main objectives, the preparatory process, the types and summaries of the sessions and their moderators. It also includes the results obtained and information on participation. It also presents the general organization of the Forum, the recommendations and the annexes.

I. Objectives

The main objective is to contribute to clarify the dark areas of the evolution of the digital economy and its prospects in Benin.

Specifically, this forum allowed to :

- Exchange on database interoperability (link between the NPI database and other company databases);
- Address the issues surrounding electronic payment in all sectors of activity;
- Exchange on the level of digitalization of the processes of public and private companies;
- Review the future of universities in the current knowledge society ecosystem ;
- Take stock of the digital economy in Benin;
- Popularize the achievements of the actors of the ecosystem of Internet in Benin;
- Propose solutions to the identified challenges.

II. Reminder of expected results

- ❖ The various stakeholders in Beninese society have a better visibility on the achievements of the digital economy in Benin;
- ❖ The flagship achievements of actors from the private, public and associative sectors

are highlighted;

- ❖ New solutions are formulated to address the identified challenges.

III. The overall process

It should be recalled that the regular holding of global, regional and national forums is a recommendation of the World Summit on the Information Society (WSIS) held by the United Nations in 2005 in Tunis. Benin organized its forum this year in accordance with the following five fundamental principles: openness and transparency, inclusiveness, bottom-up (i.e., decision-making goes from the community to the top), non-commerciality, multi-stakeholder. The overall process consisted of three main stages: the preparatory phase, D-Day process, and the post-session phase. All the tasks in this process were carried out under the supervision of the organizing committee, which validated each of the stages.

1. The preparatory phase

It is important to recall here the holding of the school on Internet Governance in Benin as a prelude to the national forum. The theme of this year's school was "**Artificial intelligence in our daily lives**". Five sessions over five days allowed the sharing of experiences between African Francophone actors and participants.

The preparatory phase began with the establishment of the MAG in April 2021. The MAG is composed of volunteer members from the different stakeholders of the Benin internet ecosystem. The initiative of the MAG comes from the IGF World and the African Union PRIDA Project. The activities of the preparatory phase consist of :

- Writing TORs,
- Searching for sponsors,
- Writing and distributing sponsorship and invitation letters,
- Following up on emails and letters sent physically,
- Producing attendance lists and mailing list,
- Drafting the final communiqué and thank-you letters to participants,
- Managing emails, phone calls and social networks

2. The event itself

Three main stages marked the Forum itself: the opening ceremony, the sessions and the final communiqué.

❖ Opening Ceremony

It was made through three speeches: the speech of **Mr. Salvator NIYONZIMA**, Resident

Representative of the United Nations System in Benin, that of the President of the organizing committee, **Mr. Kossi AMESSINOU** and the word of the President of the IGF Benin Association, **Mr. Vivien ASSANGBE WOTTO**.

The Resident Representative of the United Nations System recognized the significant progress made by Benin's State in the area of digitalization of processes. To support his remarks, he gave the example of the single portal for public services called "service-public.bj", which facilitates citizens' access to public services, regardless of their location. He encouraged the Beninese State to continue its efforts in this direction.

As for the President of the organizing committee, he thanked the sponsors and partners without whom the forum could not have taken place. After recalling therecommendations for the establishment of a national certificate on Internet governance following the model promoted by the IGF World and the African Union, in order to train a critical mass of actors in the ecosystem on the principles of Internet governance, he praised all the former presidents of the IGF Benin who "have kept the torch of the Internet lit, to bring it to the new generation."

Finally, the President of the IGF Benin gave his welcome address.

"Internet andICTs facilitate processes, reduce the marginality of disadvantaged groups, and enable the fundamental objective of economic development, which is the fight against poverty and exclusion," he said, thanking the Government of Benin through the Ministry of Numeric and Digitalization, the directorates and agencies of the sectorfor their availability and collaboration.

He also expressed his gratitude to the partners of the event, namely the Secretariat of the IGF World and the IGF Support Association, the company ISOCEL TELECOM BENIN which has graciously offered the Internet bandwidth for remote participation, JENY SAS, without forgetting SBIN SA, Internet Society, ICANN and African ICT Foundation. According to Mr. Vivien ASSANGBE WOTTO, the differencebetween the IGF Benin Association and other organizations is that it is the only organization based on such diversity.

Stakeholders have their views and each one is specifically taken care of. He concluded by explaining that "the functioning and positions of IGF Benin therefore never reflect individual positions, but emanate from consensual discussions. ". He also justified the choice of the theme by the need to take stock of the progress of the digital economy in the country.

❖ **The sessions themselves**

Types of sessions : Due to the current health crisis, and to avoid large gatherings,the Forum was held in hybrid mode, i.e. a maximum of 50 people in the room and the rest of the

participants online on Zoom.

- **Moderators and sessions' summaries**

Synthesis of Session 1: High Level Panel on the Digital Economy in Benin

The high-level panel on the digital economy was moderated by **Mr. Pierre DANDJINOU**, ICANN Vice President for Africa. It was online. The participants in this panel are among others: representatives of the organizations stakeholders of the Internet in Benin.

al theme of the tenth edition of the National Forum on Internet Governance in Benin, let us recall, is "Prospects for the Digital Economy of Benin 2021-2030"

The high-level panel is reserved for public decision-makers so that they can define the benchmarks for the digital economy in Benin in line with the government's vision. The discussions were fruitful at this level. **The Resident Representative of the United Nations System in Benin, Mr. Salvator Niyonzima**, indicated that the development of a sustainable digital economy depends mainly on the quality and cost of the Internet connection. The speakers emphasized the high cost of the Internet compared to its quality. They hoped that the migration to IPv6 would become a reality, and that the State would be able to involve the ecosystem structures and other stakeholders in the digital policy-making processes.

Synthesis of Session 2 : Challenges of Digitalization of processes, interoperability of databases, electronic payments and the digital future of universities

This second session is moderated by Mrs. **Dorice DJETON GOUDOU**, PhD. student in Information and Communication Sciences, specialist in media and digital literacy, from the university community. The objective here is to define the stakes of the digitalization favorable to the digital economy in order to clearly perceive the impacts on the access to the services, and on the interoperability of the data bases, in order to bring out the repercussions for the universities in the current context. There were many participants in this session, which brought together all the stakeholders, and the list is presented in the

table below.

Session 2	Participants
<p>Issues of process digitization, database interoperability, electronic payments and the digital future of universities.</p> <p>Moderator: Mrs. Dorice DJETON GOUDOU</p>	<p>The representative of MND, the representative of the Beninese Agency for Universal Electronic Communications and Postal Services (ABSU-CEP), representatives of students from Benin's private and public universities, representatives of young people from youth associations, representatives of professional confederations, representatives of Benin's administration, representatives of craftsmen and women, representatives of traders, ICT professionals, digital infrastructure providers, GSM operators, Internet access providers, Internet exchange points, political actors, actors of the society of Benin, and representatives of the media; Representatives of traders; ICT professionals; digital infrastructure providers; GSM operators; Internet service providers; Internet exchange points; political actors; civil society actors; local elected officials (ANCB); international organizations based in Benin; the representative of SBIN SA; Internet users.</p>

Summary of Session 2: Challenges of the digitalization of processes, the interoperability of databases, electronic payments and the digital future of universities

The digital economy refers to economic and social activities carried out through digital platforms and e-commerce. It is of great support to the development of private enterprises and public services. In view of the discussions during this session, it was noted that digitalization boosts the economy by saving time in processes and leads to rapid and simplified communication between the various parties (public services, private companies and citizens) without forgetting the improvement of working conditions.

Participants from state structures and agencies presented some of the government's achievements in this regard. We note that since 2016, an extension of more than 2,000 km of optical fiber has been made, which has accelerated the digitization of processes. More than 520 services are available online on the "service-public.bj" website, and more than 72 services are delivered to citizens through digital means. For example, more than 100,000 criminal records have been issued since 2020 in a very short time. These achievements make Benin one of the fastest countries in the creation of business with current terminals: smartphones, tablets, computers.

However, the report is not brilliant on all fronts. Speakers, in this case the Association of Consumers of Benin, has decried both the quality and cost of the Internet connection presented as the fuel of the digital economy. According to him, the interactions between Internet access and service providers and the government must be reviewed for the benefit of end consumers.

At the level of universities, particularly the University of Abomey-Calavi and that of Parakou, despite the launch in 2020 of the e-learning platform "<https://elearning.etudiant.bj/>" at the height of the covid-19 pandemic, it must be noted that the effectiveness observed has not been up to expectations. Indeed, the academics present evoked three points which constitute challenges to be taken up:

1. the low quality of the internet speed,
2. the issue of training teachers themselves to put teaching materials online, and
3. educating learners to take full advantage of digital technology through the proper use of infrastructure and good online habits.

All in all, universities still need more attention from the public authorities when it comes to the Internet.

Synthesis of Session 3 : Prospects for the Digital Economy of Benin.

The third and last session of the Forum on Internet Governance in Benin, 2021 edition, was moderated by **Mr. MAHOUSI Wenceslas**, Doctor in Information and Communication Sciences. Archivist-Documentalist by training, he is an expert-consultant and trainer on documentary and archival issues, and teaches at the University of Abomey-Calavi (UAC). The session he had the honor of moderating is the logical

continuation of the previous one, and focuses on the prospects of the digital economy of Benin. It saw the participation of all.

The objective was to evaluate the progress made, the results obtained in terms of the digital economy, and to formulate possible solutions to the challenges identified. From the discussions and contributions made here, it appears that the prospects are good for Benin in terms of the contribution of digital technology to its economic and social development in the years to come. This positive outlook should not, however, overshadow the challenges imposed by the occurrence of covid-19 and those inherent in the quality and cost of the Internet in the country.

Finally, a plea was made to the authorities to facilitate access to digital terminals (computers, tablets, smartphones, etc.) as well as their acquisition or to reduce the fees related to taxes. The terminals are seen as an essential lever to enhance the prospects for the digital economy.

3. The post session phase

It is dedicated to the writing of the different reports in the required formats: Final Communiqué, forum report, acknowledgements.

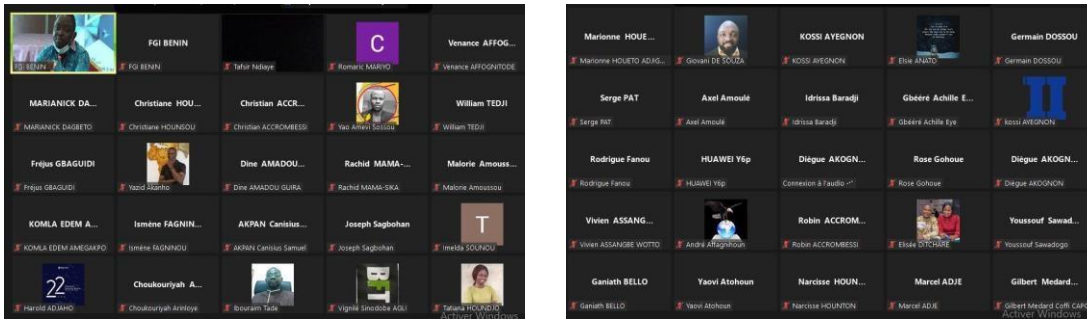

IV. Results obtained

The 10th edition of the Forum on Internet Governance in Benin achieved the objectives set at the outset, both in terms of results obtained and participation. They are grouped into three main points:

- The various stakeholders in Beninese society have a better view of what has been achieved in terms of digital technology and the digital economy.
- The main contributions of private, public and associative actors in the field of the Internet and the digital economy were highlighted during the debates.
- New challenges are identified and solutions formulated through recommendations, in order not to miss the prospects envisaged for the digital economy of Benin by 2030.

V. Participation

It should be noted here that the organizing committee strongly encouraged participants to register to follow the forum online. The counts were made from data from the Zoom application on registrants and people who actually logged on the platform on September 28, 2021. The maximum number of participants expected in the room is 50. Online there was no limit to participation.

Two hundred and thirty (230) people were online on the Zoom platform, while in the room, we counted thirty-three (33) people, making a total of two hundred and sixty-three (263) participants. In view of the participation in person, we establish **the participation rate at 66%**

Ventilation de la participation par genre

The overall breakdown of stakeholders by gender shows an overwhelming majority of men: 219/263 ; and for women, 44/263.

VI. Recommendations

At the end of the day, the various stakeholders made recommendations. They are addressed to several actors, whether from the public or private sector, civil society, local elected officials, international organizations based in Benin, GSM operators, digital infrastructure providers and ICT professionals. They can be summarized as follows:

- Continue the government's efforts despite significant progress in digitizing processes,
- Make both public and private structures the main investors in the digital economy,
- Accelerate the electrification of rural areas to enable people in these areas to have access to digital resources,
- Make the quality of the Internet connection commensurate with the costs involved,

- Reduce disparities in access to the internet in the context of the covid19 health crisis,
- Update government guidelines with respect to technological innovations, to make them fully compatible with the implementation of e-learning processes,
- Train university teachers to put course and assessment materials online and to update them independently,
- Increase awareness of the digital code to avoid slippage,
- To popularize the strategy documents and the Digital Code in national languages and in audio version,
- To make learners aware of the importance of e-learning and the proper use of digital tools,
- Increase awareness among young people of the new jobs linked to digital technology and of all the services already available online,
- Motivate the companies and structures of the digital ecosystem in Beninto ensure the financing of the renewal of the Internet infrastructure,
- Make mobile Internet more accessible in terms of cost and quality to allow young startups to innovate,
- Exempting Internet access terminal equipment from taxation to facilitate Internet access,
- Include civil society associations, the technical community, the academic community, private structures, including women and youth, in the production of national digital strategy documents,
- Consider organizing thematic field studies to investigate Internet user behavior based on a three-stage process: collection, distribution, accessibility,
- To further motivate learners to participate in the activities of the Internet Governance Forum,
- Integrate Internet governance training into secondary education.

VII. SPONSORS

- IGF Monde, (FINANCIAL SPONSOR)
- IGF Support Association, (IGFSA) (FINANCIAL SPONSOR),
- ASSOCIATION FGI BENIN, (FINANCIAL SPONSOR)
- ISOCEL TELECOM,(SPONSOR INTERNET CONNECTION)
- JENY SAS, (FINANCIAL SPONSOR)
- Azalai Hôtel de la Plage (SPONSOR CONFERENCE ROOM)

- ISOC Benin (SPONSOR Taking charge of the refreshment of the organizing committee)

VIII. OTHER ASPECTS

Public Partners

- Ministry of Numeric and Digitalization (MND)
- National Agency for the Security of Information Systems (ANSSI),
- Digital Department (DN)
- Information Services and Systems Agency (ASSI),
- Digital Development Agency (ADN),

Private Partners

- CCIB
- ISOCEL TELECOM
- JENY SAS
- SBIN SA

Partners Associations

- FGI BENIN Association,
- West African IGF (WAIGF),
- IGBANET,
- Internet Society (ISOC) BENIN Chapter,
- ABCPN,
- AFRICAN ICT FOUNDATION

Educational Partners

- UAC, University of Abomey Calavi

X. Acknowledgement

Let us thank the structures that provided advice, technical, financial and logistical support for the organization of this tenth edition of the National Forum on Internet Governance in Benin:

- Ministry of Numeric and Digitalization (MND)
- Coordination of the United Nations System in Benin (C/SNU)
- National Agency for the Security of Information Systems (ANSSI)
- Digital Development Agency (ADN)
- Information Services and Systems Agency (ASSI)
- Regulatory Authority for Electronic Communications and the Post Office (ARCEP)
- Beninese Agency for Universal Service and Electronic Communications and Post (ABSU-CEP),
- Personal Data Protection Authority (PDPA)
- National Association of Benin Municipalities (ANCB)
- ISOC Benin Chapter
- ABC-PN Association
- ICANN
- AFRICAN ICT FOUNDATION
- IGF Support Association
- Internet Governance Forum secretariat (IGF)
- Benin Trade and Industry Centre (CCIB)
- Moov Africa Benin
- ISOCEL Benin
- JENY SAS
- Beninese Digital Infrastructure Company (SBIN SA)
- University of Abomey-Calavi (UAC)
- Azalaï Hotel de la Plage

We thank the organizing committee, moderators, panelists and participants of the 10th National Forum on Internet Governance in Benin for their availability.
