
Dynamic Coalition on Network Neutrality

1. SDG to which your DC work is most strongly related to

- GOAL 8: Decent Work and Economic Growth
- GOAL 9: Industry, Innovation and Infrastructure
- GOAL 10: Reduced Inequality
- GOAL 17: Partnerships to achieve the Goal

2. Outline achievements of your DC in regard to that SDG

The Dynamic Coalition on Network Neutrality has been constantly working towards the promotion of free and open Internet access, developing research and policy proposals since 2013 (see <http://www.networkneutrality.info/sources.html>). Most notably the Model Framework on Net Neutrality elaborated by the DCNN has directly inspired the elaboration of the Council of Europe Recommendation on Net Neutrality (see <https://rm.coe.int/16805a09ca>)

As a 2019 outcome the DCNN has elaborated a website featuring informative resources, helping the general public understanding the impact of zero rating practices and how they are regulated (see www.zerorating.info)

3. Outline plans towards 2025 and that specific SDG

The DCNN plans to further analyses the intersections and (in)compatibility between the net neutrality principle and the most recent development regarding Internet access technology and business models, such as 5G, industrial Internet and IoT, and zero-rating plans. The work of DCNN directly relates to:

- 8: Decent Work and Economic Growth
- 9: Industry, Innovation and Infrastructure
- 10: Reduced Inequality
- 17: Partnerships for the Goals

4. List Policy Question related to the work of your DC and in regard to the specific SDG

What could be the negative impacts of some technological evolutions and business models, such as 5G, industrial internet and IoT and zero-rating plans on internet user rights and on innovation?
