

B. OVERALL PROGRAMME STRUCTURE AND FLOW

- Create a list of key processes, entities, and issue areas, particularly those that include or are looking for multistakeholder consultations, and engage them in the IGF. Use this as a starting point to consider moving away from a proposals-based programme structure only, or one that integrates both approaches - gives space to community proposals and multistakeholder consultations that respond to global processes.
- Integrate intersessional work and high-level track into a unique thematic framework.
- Allow space for emerging issues.
- Consider holding a separate intersessional one-day event, led by intersessional groups, separate from the week-long forum.
- Support was expressed for the continuation of the Preparatory & Engagement phase.
