

Excellencies

Thank you for the 16th IGF 2021 outputs. While it is the first IGF hybrid during the pandemic. We urge you to include the perspectives of Judiciary too in all the outputs. One key aspect that has been missing in all output documents is the integration of Judiciary with Internet governance.

IGF outputs and the theme "  
Internet United – the Internet connecting all its users into one community, responsible for its shape and functioning. Our shared dreams, ideas, needs and actions are what shapes the Internet of the future!"

The participation this year has been overarching and has very holistic discussions and debates.

Governance is complete only if Judiciary has its approval too.

Any good governance models must include Judiciary too as we see all over the world the changes Judiciary has been implementing too.

Regards
