INTRODUCTION

Welcome Message / Tour de Table

MWG COMPOSITION / RENEWAL

- Current and new members
- Call for identification of new partners
- PNMA will also get in touch with current ones for confirmations

2023 ACHIEVEMENTS

Focus Areas: Connectivity, Digital Inclusion, and Capacity Development

- Expansion of meaningful access practices collated in 2022 as benchmarks for implementation and scaling
 - Regional collaboration
 - Connections within and outside the IGF community (NRIs, DCs, intergovernmental organisations)
- Call for updates of the [PNMA Repository of Good Practices](#)
- Community's list of recommended actions and key issues around meaningful access

2024 PROCESS: PROPOSAL

Assist and advocate for the implementation of policy solutions for the key issues previously raised, while monitoring ongoing experiences and welcoming new practices.

- Focus Areas: Connectivity, Digital Inclusion, and Capacity Development

Actions

Permanent dialogue /
public debates

- Outputs: reports, recommendations, repository, relationships

Follow-ups

Updates /
Ongoing survey

- Timeframe: draft report ready by **10 December**

- Priority goals following 2023 collaborative considerations

2024 PROCESS: PRIORITIES (TBD)

1. In close communication with the **Leadership Panel**, bring all the achievements and solutions identified through the PNMA activities into the future **Digital Compact Initiative**, and effectively contribute to the roadmap leading to the **Summit of the Future 2024 and the WSIS+20 and IGF+20 processes**.
 - The contribution will actively promote good practices, to be presented on a multisectoral approach following the three focus areas for PNMA analysis and under the lens of intersectionality, scalability, and localisation - with attention to lessons drawn from project implementation lessons and policy/regulatory conditions that enabled said achievements.
 - Benchmarks and good practices will continue to be monitored for implementation and scaling in their region of origin and, eventually, in other regions inspired by the same process.
 - Focus the PNMA work on **project implementation lessons and policy/regulatory conditions** that supported the achievements previously collated, on a multisectoral approach and under the lens of intersectionality, scalability, and localisation.
2. **Amplify the voices of those groups that are less heard** in the public debate on meaningful access (e.g., Women, Youth, NRIs, LGBTQIA+, Indigenous, People with Disabilities, Minority Languages Communities) by actively listening to them and having these groups lead on what are their challenges and viable solutions to be developed. Encourage their **involvement** in the current PNMA Process, starting from the considerations emerged during year 2023, about the relevance of gender gap for Meaningful Access. For 2024, particular attention needs to be paid to the **emerging applications of A.I.** that could improve the access experience for groups traditionally marginalized.
3. Under the guidance and assistance of the IGF Secretariat, **open a permanent dialogue between the PNMA community and institutional regional and global partners** (such as the EU, the AU, and the OAS), to involve them directly in the PNMA activities and to encourage regional projects' replication and adaptation in other countries, with active participation of local actors.
