

IGF 2017 Workshop Evaluations

Statistical Synthesis

Slots Available & 'Cut-Off' Score

>> 80 workshop slots to fill in the programme

Compared with the 96 workshops ultimately on the schedule in 2016, this will allow more space for Government and IGO-organized open forums, HOT TOPICS and a potential track of NRI-focused sessions

>> 72 workshops with highest scores automatically accepted

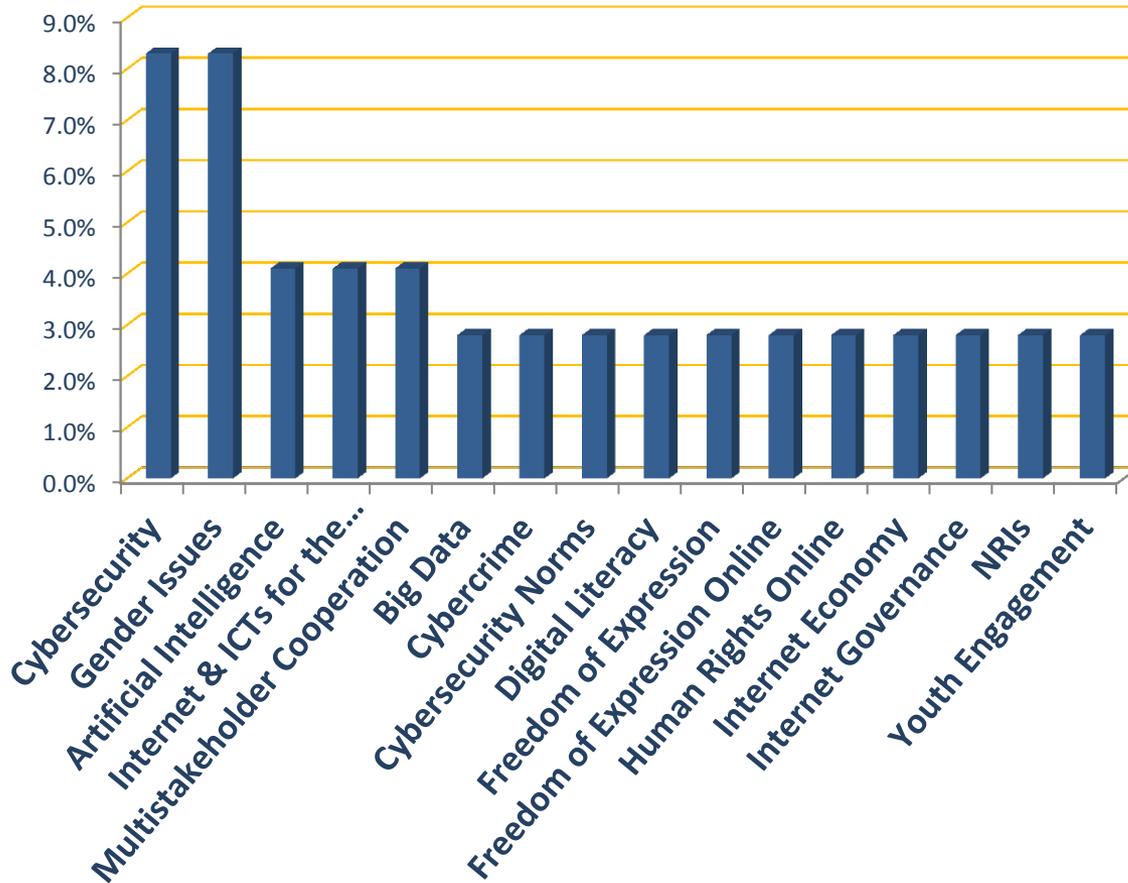

This will leave 8 slots to be filled with proposals which are either 'wild cards', help redress regional/stakeholder imbalances, or both

>> Score cut off at 4.04 for automatic acceptance

In order to fill a target number of 80 slots and leave a certain number empty for 'wild cards' and others, this was the most reasonable cut-off – 7 workshops are tied with the next highest score (4.05) and 2 workshops are tied with the next lowest score (4.035)
