
Dynamic Coalition on Blockchain Technologies

1. SDG to which your DC work is most strongly related to

- GOAL 9: Industry, Innovation and Infrastructure

2. Outline achievements of your DC in regard to that SDG

Our DC produced two research reports advancing SDG Goal 9: Industry, Innovation and Infrastructure. The first report, "How Blockchains Can Support, Complement, or Supplement Intellectual Property" advances SDG Goal 9 by considering ways that blockchain technology can improve the existing infrastructure generally thought to advance innovation policy (intellectual property law). The second report, "A Primer on Cryptosecurities" considered the multi-jurisdictional legal hurdles to accessing new capital through tokens built on blockchain technology, which advances Goal 9 by considering what the legal infrastructure has to say about industry using blockchain technology for innovative funding.

3. Outline plans towards 2025 and that specific SDG

The Dynamic Coalition is working on a long-term project related to Goal 9: Industry, Innovation and Infrastructure. Specifically, the Dynamic Coalition is working on research related to new forms of business organization and their legal treatment across jurisdictions. Such work aims to promote corporate transparency, accountability and audit-ability through new, innovative corporate infrastructure with the potential to radically alter the landscape of industry.

4. List Policy Question related to the work of your DC and in regard to the specific SDG

How can decentralized autonomous organizations, which hold potential to innovate the very basics of how productive society organizes enterprises, interact with existing legal and social structures in order to realize that potential, and what potential downsides surface as a result of promoting such interaction?
