Coordinator: Carlos Guerrero – carlos@hiperderecho.org

DESCRIPTION OF THE ORGANIZING PROCESS:

The agenda for this edition was defined based on the results of a public poll conducted between February and March of 2016. More than 500 users voted. Then, main members of the initiative formed a program committee composed of representatives of various public and private institutions. This Committee was responsible for defining the agenda and invite panelists.
Finally, they instructed the NGO Hiperderecho to take on charge the event logistics.

DESCRIPTION OF HOW THE MULTISTAKEHOLDER MODEL IS MAINTAINED:

In order to create an Internet Governance Forum that meets the principles of open, inclusive, non-commercial, and multi-stakeholder participation; we established a dialogue with other organizations interested in participating in the event. After the meetings we reached a consensus on the place, date and agenda of the forum.
With the purpose to reflect the principal issues of the country about Internet, we opened a process of public consultation of two months. In this consultation, users voted for topics of their interest or for a previously proposed theme.
When the public consultation was closed, top issues met in different categories and organizers sent their proposals for panelists, always looking for that in each category there was a balance between stakeholders.
The event was open to the public, free of charge and was widely disseminated in digital media.

At the end of the conference, the videos of all debates were posted on the official website of the event gobernanzadeinternet.pe.

MEETING AGENDA:

Also, the agenda is published on the website (http://gobernanzadeinternet.pe/agenda/)

Agenda:
