

OR ZOOM

Our achievements

ZOOM

Since our inception and until day, we have produced simple and understandable publications. Our publications mainly concern everything that is happening in the digital world.

CHARACTER OF THE MONTH

Each month a special focus was made on a character who has made a contribution in one way or another to the development of technology, computing or the digital world in general. Our very first character of the month was Steve Jobs, a visionary who was ahead of his time.

DAILY SMALL ZOOM

Daily, on our main pages, small zooms (called capsules) are published on a hot topic.

ARTICLES

We also produce reflections through some posts in article form.

The Internet must be a space of freedom and security for all.... it should be accessible to all

Brochure

VALUES

We primarily prioritize emerging or existing areas of Internet Governance, Internet and Technology. Nevertheless, certain considerations are made in specialcases where we should intervene.

OBJECTIVES

1. Popularize and dissenminate knowledge on: internet governance, internet and Technology
2. Promote the digitization of certain services provided by public and / or private bodies
3. Fight against disinformattinn, defamation ,fake dype (fake videos) ...

HOW WE WORK

we publish on all platforms and on our website via capsules containing images, text and sometimes videos. we also have projects on Introducing web Technology to introduce children to the internet.

VISION

Our vision is to change the conception of digital technology in Haïti and facilitate access to theorethical and / or partial knowledge of technological tools.

MISSION

Equip young people with a theorethical and pratical background so that they can engage, at the local level, in the field of internet governance

Train a network of young people who are competent to solve certain local problems relating to the areas we are targeting.

ABOUT US

we are a popularization and dissemination program on internet governance(IG), internet and Technology.
