 SESSION OVER

 DISCUSSION

## Social Capital x Youths: To Trust or Not to Trust?

 EN  Youth Zone  Health, Privacy & Security, Web Literacy  Not recorded

Session aims to consider youth opinions on three aspects of trust as social capital in the context of being active online; trust in content, trust in people, trust in technology.

Trust in content: How content from other users or oneself can impact feelings of trust [e.g. self-generated sexualised content, fake news] Trust in people: How interactions with people online (moderators/peers/admins) can affect trust [e.g. Reporting cyberbullying/harassment/copyright strikes] Trust in technology: How biases in AI/algorithms/deceptive design can be negative experiences for youth users

Session organisers hope to collect opinions to act as basis for future sessions/reports on trust for youths from a youth perspective.

PAST

**11:00 PM → 12:00 AM**

March 23 → March 24

Asia/Tokyo

## ACTIONS

If you wish to attend this session please login and press the "Add to My Schedule" button. Links to join the session will then appear 15 minutes before the session starts.
