About

The Youth LACIGF is an initiative born from the growing community of Latin American youth interested in issues related to the Internet. Given the active role that the youth have started taking, this new space is created with multi-sectoral characteristics, as a forum for debate of new ideas and perspectives to encourage the creation of lines of discussion that will be taken to other forums.

The whole organizational process is conducted in a communication with the IGF Secretariat and in accordance with the main IGF criteria and established procedures, as explained below.

IIa Description of the organizing process:

The event “YouthLACIGF” was an initiative proposed to bring a space for young people of the region from different stakeholders to discuss, from its own views, the main issues and the principal challenges they faced every day in Internet.

The agenda for this edition was defined based on the results of a public poll conducted between the end of June and the beginning of July, 2016. More than 70 users voted. Then, main members of the initiative formed a Program Committee composed of representatives of all the stakeholders involved. This Committee was responsible for defining the agenda, the format of the discussions and logistics details.

IIb Description of how the multistakeholder model is maintained

In order to create an Internet Governance Initiative that achieves the goals of openness, inclusiveness, non-commercial, and multi-stakeholder participation; the main organizers

established a dialogue with other stakeholders interested in the event. At the end of June, we had the participation of 5 actors from different stakeholder groups, involved.

In the same way, with the purpose to reflect the principal issues of the youth community in the region, we opened a process of public consultation for three weeks. In this consultation, users voted for topics of their interest or for previously proposed themes.

The Committee decided to use the format of “Bird of Feathers” to maximize the participation of all attendees. The event was open to the public, free of charge and was widely disseminated in digital media. All the sessions were recorded and were posted on the official website, [here](#). (we expect to have subtitles to English and Portuguese in the next two months).
