BACKGROUND & CONTEXT

THE IGF AS AN OUTCOME OF WSIS

Internet governance was one of the most controversial issues during the first phase of the World Summit on the Information Society (WSIS-I), held in Geneva in December 2003. It was recognised that understanding Internet governance was essential to achieving the development goals of the Geneva Plan of Action, but defining the term and understanding the roles and responsibilities of the different stakeholders involved proved to be difficult.

The UN Secretary-General set up a Working Group on Internet Governance to explore these issues and prepare a report to feed into the second phase of WSIS (WSIS-II), held in Tunis in November 2005. Many elements contained in the working group’s report -- developed through an open process and multistakeholder consultations -- were endorsed in the Tunis Agenda for the Information Society, one of the main outcomes of WSIS-II. These included, among others, a definition of the term Internet governance, and a recognition that the process of Internet governance involves many stakeholders in a variety of roles.

Internet governance is the development and application by governments, the private sector and civil society, in their respective roles, of shared principles, norms, rules, decision-making procedures, and programmes, that shape the evolution and use of the Internet (Tunis Agenda for the Information Society)

WSIS-II requested the Secretary-General to convene an Internet Governance Forum, as a multilateral, multistakeholder, democratic and transparent platform for discussions on Internet governance issues.
IGF MANDATE

Paragraph 72 of the Tunis sets the mandate of the IGF to:

- Discuss public policy issues related to key elements of Internet governance in order to foster the sustainability, robustness, security, stability and development of the Internet.
- Facilitate discourse between bodies dealing with different cross-cutting international public policies regarding the Internet and discuss issues that do not fall within the scope of any existing body.
- Interface with appropriate intergovernmental organizations and other institutions on matters under their purview.
- Facilitate the exchange of information and best practices, and in this regard make full use of the expertise of the academic, scientific and technical communities.
- Advise all stakeholders in proposing ways and means to accelerate the availability and affordability of the Internet in the developing world.
- Strengthen and enhance the engagement of stakeholders in existing and/or future Internet governance mechanisms, particularly those from developing countries.
- Identify emerging issues, bring them to the attention of the relevant bodies and the general public, and, where appropriate, make recommendations.
- Contribute to capacity building for Internet governance in developing countries, drawing fully on local sources of knowledge and expertise.
- Promote and assess, on an ongoing basis, the embodiment of WSIS principles in Internet governance processes.
- Discuss, inter alia, issues relating to critical Internet resources.
- Help to find solutions to the issues arising from the use and misuse of the Internet, of particular concern to everyday users.
- Publish its proceedings.

The initial mandate of the IGF was for five years, between 2006 and 2011. Recognising the importance of the Forum in fostering the sustainability, robustness, security, stability and development of the Internet, as well as its role in building partnerships among different stakeholders, the UN General Assembly renewed the IGF mandate for five years, in 2010, and for a further ten years, in 2015.
IGF ANNUAL MEETINGS

Each year, the IGF annual meeting brings together stakeholders from around the world to discuss some of the most pressing Internet governance issues. Participants represent governments, intergovernmental organisations, the private sector, the technical community, and civil society (including academia). Normally spanning a week, IGF meetings facilitate the exchange of information and the sharing of good policies and practices related to the evolution, use and governance of the Internet.

Past IGF Meetings
IGF 2006 | Athens, Greece
IGF 2007 | Rio de Janeiro, Brazil
IGF 2008 | Hyderabad
IGF 2009 | Sharm el Sheikh, Egypt
IGF 2010 | Vilnius, Lithuania
IGF 2011 | Nairobi, Kenya
IGF 2012 | Baku, Azerbaijan
IGF 2013 | Bali, Indonesia

Upcoming IGF Meetings
IGF 2023 | Kyoto, Japan
IGF 2024 | TBD
IGF meetings are built through an open and inclusive process, with the involvement of the Internet governance community and under the overall coordination of the Multistakeholder Advisory Group (MAG) and the IGF Secretariat. The process typically involves calls for issues (to help determine the main topics to be covered during the meeting), calls for workshop and other session proposals, and several rounds of open consultations.

The structure of an annual meeting generally involves: main sessions, workshops proposed and organised by the community, open forums showcasing the work of international organisations, and sessions reflecting on the IGF intersessional work. Recently, the programme has been extended to also include high-level sessions, a parliamentary track, and a youth track.

The proceedings of IGF meetings are reflected in Chair summaries. Starting 2017, IGF Messages are also developed to provide a high-level overview of the discussions and highlight the most important points raised during the discussions, in particular with regard to actions and steps needed to be undertaken to address certain Internet governance issues.

**INTERSESSIONAL ACTIVITIES**

In between the two annual IGF meetings, IGF stakeholders work on several substantive activities and presents and discusses them at the annual IGF meeting. These activities are collectively called IGF intersessional work and are developed around:

- **Dynamic Coalitions (DCs)**

  These are open, multistakeholder and community-driven initiatives dedicated to exploring a certain Internet governance issue or group of issues. DCs are self-organised, and their work – required to adhere to a series of guidelines and principles – spans multiple years. Currently there are 24 active dynamic coalitions focused on topics such as Internet rights and principles, innovative approaches to connecting the unconnected, accessibility and disability, digital health, child online safety, etc. The collective work of the DCs, including their participation at IGF annual meetings, is facilitated by the IGF Secretariat.

- **Best Practice Forums (BPFs)**

  These provide a platform for stakeholders to exchange experiences in addressing Internet policy issues and discuss and identify existing and emerging best practices. BPFs are expected to be open, bottom-up and collective processes, and their outputs to be community-driven. They are organised under the supervision of the MAG, which selects BPF topics, typically on an annual basis. Previous BPFs have dealt with issues such as spam, Internet Exchange Points, new technologies, and local content. The BPF on Cybersecurity, a multi-year activity, has been approved for 2023.
Policy Networks (PNs)

These are framework networks dedicated to broad Internet governance topics. The networks are made up of interested stakeholders, while the topics are chosen by the IGF Secretariat through various public consultations during IGF meetings. PNs aim to provide in-depth understanding of the chosen topics, raise awareness of the particular issues, and prompt cooperation across regions and stakeholder groups in seeking improvements/solutions. Between 2015 and 2018, an intersessional workstream explored Policy Options for Connecting and Enabling the Next Billion(s). In 2022, the IGF Secretariat oversaw the work of the Policy Networks on Meaningful Access and on Internet Fragmentation. In 2023, these two PNs were re-chartered, with the addition of a new Policy Network on Artificial Intelligence.

NATIONAL, REGIONAL & YOUTH INITIATIVES

Over the years, the IGF has triggered the launch of similar initiatives at national and regional levels, focused on facilitating dialogue and cooperation on Internet policy issues of utmost relevance for their respective communities. While being organic and independent, NRIs act in accordance with the IGF main principles (e.g. bottom-up, open, transparent, inclusive, multistakeholder and non-commercial). The NRIs collective work and cooperation is facilitated by the IGF Secretariat.

As of April 2023, there are 153 NRIs recognised by the IGF Secretariat.
Newly established for the 2022 and 2023 cycles, the Leadership Panel is a strategic and empowered high-level body which addresses any urgent IGF issues, coordinates follow-up action on Forum discussions, and relays proposed policy approaches and recommendations to the appropriate normative and decision-making bodies. The 10 members of the Panel are appointed by the UN Secretary-General and represent the IGF’s various regional and stakeholder groups.

The MAG is appointed by the UN Secretary-General to advise on the programmes and schedules of IGF annual meetings, as well as intersessional activities. The MAG comprises 40 members from governments, the private sector, civil society, academia and technical communities, from all five UN regional groups (Africa, Asia-Pacific, Eastern Europe, GRULAC, WEOG). It holds meetings throughout the year to review IGF progress and to substantively plan the IGF annual meetings.
Secretariat support to the IGF and its MAG is provided by the IGF Secretariat, which resides at the UN Office in Geneva. In UN terms, the IGF Secretariat is an extra-budgetary project financed through voluntary contributions from the multistakeholder community. Its terms of reference are laid out in its project document.

The Under-Secretary-General of the UN Department of Economic and Social Affairs (DESA) was entrusted by the Secretary-General to institutionally support the work of the IGF Secretariat.
The IGF Secretariat is sustained financially through the extra-budgetary Trust Fund Account managed by UN DESA. The nature of the IGF Trust Fund is such that it is voluntary and multi-donor driven, with varying contributions from governments and non-governmental organisations from the technical community, the private sector and civil society. The IGF Trust Fund covers the administrative and operational costs of the IGF Secretariat including personnel, fellowships, and funds the travel costs of MAG members from developing countries. The Trust Fund also provides support to various intersessional activities, inter alia BPFs or other major policy initiatives.

The Internet Governance Forum Support Association (IGFSA) has played an important role in aggregating and handling small donations to support the IGF. It supports NRIs and contributes to the IGF Trust Fund. The legal framework for the relations between UN DESA and IGFSA is set forth in an exchange of letters.

The organisational and conference costs of annual IGF meetings (other than those described above) are covered by the government of the host country, administered through a Host Country Agreement signed between the government and UN DESA.

Complete lists of donors and detailed financial information are continuously updated and available at intgovforum.org.
As a platform for discussions, the IGF brings various stakeholder groups to the table as equals to exchange information and share good practices. Over the years, it has identified a wide range of issues to be addressed by the international community and has shaped decisions taken throughout the world.

The IGF does not adopt resolutions or create any binding treaties. Its importance lies in its ability to facilitate discourse between governments, intergovernmental organisations, private companies, the technical community and civil society organisations that deal with or are interested in Internet governance related public policy issues. The IGF – through its annual meetings and intersessional activities – facilitates discussion on proposed regulatory frameworks, potential risks, global trends, as well as best and worst practices that have been adopted or are currently under discussion. Participants also examine the impact of treaties, recommendations and other documents adopted in various international venues within the Internet governance ecosystem.

While the Forum may not have decision-making mandates, it informs and inspires those who do. It facilitates a common understanding of how to maximise Internet opportunities and address risks and challenges.

The IGF also ensures that stakeholders from developing countries are equally able to engage in the debate on Internet governance. Supported by contributions from its donors, the IGF aids (provides grants and facilitates the organisation of workshops, webinars, and town halls) local communities to build knowledge and skills that will facilitate their participation in existing Internet governance institutions and arrangements. Ultimately, the involvement of all stakeholders, from developed as well as developing countries, is necessary for advancing dynamic public policies in Internet governance.
PARTICIPATE IN IGF 2023!
KYOTO, JAPAN | 8-12 OCTOBER

As the Internet grows and evolves, it will continue to be the subject of policy debates. All stakeholders must take an active role in managing the Internet and addressing governance challenges.

This is why the IGF is open to and encourages the participation of anyone interested – free of charge – both in its annual meetings and intersessional activities.

The 18th annual IGF Meeting will be held at the Kyoto International Conference Center in Kyoto, Japan, from 8 to 12 October 2023 under the overarching theme, "The Internet We Want - Empowering All People".

The programme will be structured around eight subthemes:
- AI & Emerging Technologies
- Avoiding Internet Fragmentation
- Cybersecurity, Cybercrime & Online Safety
- Data Governance & Trust
- Digital Divides & Inclusion
- Global Digital Governance & Cooperation
- Human Rights & Freedoms
- Sustainability & Environment

All are invited not just to attend the annual meeting in Kyoto and participate in discussions, in-person or online, but also to propose sessions for the meeting. Session proposals on the programme subthemes were made through the IGF’s Annual Call for Session Proposals until May 2023.

Further opportunities for learning about and participating in the 18th IGF - such as attending the planning meetings of the IGF’s Multistakeholder Advisory Group - are continuously made available on the IGF website.
Another excellent way to engage ahead of Kyoto is through the IGF’s intersessional activities, whether they be one of the 24 issue-specific Dynamic Coalitions, or the four policy streams activated in 2023: the Best Practice Forum on Cybersecurity, the Policy Network on Artificial Intelligence, the Policy Network on Internet Fragmentation, and the Policy Network on Meaningful Access.

Open mailing lists and online discussions for each mean anyone can join from anywhere at anytime.

With more than 150 National, Regional & Youth IGF Initiatives, there is an IGF for almost everyone in the world. Being part of the IGF initiative closest to one’s country, region or demographic is an opportunity to contribute to local digital policy discussions that become key inputs for the global IGF. Joining a local initiative is some of the best preparation for interested stakeholders to engage on the issues at the annual IGF in Kyoto.

Since its early days, IGF has dedicated efforts to facilitate the participation of those who, for various reasons, cannot attend meetings in person. Online participation has been part of all IGF meetings, relying on and selecting for optimal digital participation tools as they became available.

All IGF events follow a model of multistakeholder, open, inclusive and bottom-up participation.

The IGF looks forward to meeting you, in person or online!
THANK YOU
